A comprehensive look at what it really takes to lead transformation successfully, written by two of the "masters of the craft." The author's best-selling first edition has been significantly updated to deliver critical insights about how leaders can achieve breakthrough results from transformational change, even in these challenging times. The book introduces conscious change leadership and provides insights about the critical human and change process dynamics that leaders must be aware of in order to succeed, and reveals why most leaders do not see these dynamics. It thoroughly addresses leadership mindset and behavioral modeling, culture change, and large systems implementations, providing best practices developed over three decades of successful consulting to Fortune 500 executives. Written for executives and managers, OD consultants, change managers, project managers, and change consultants, this must read book provides the foundation for successful change leadership and consulting. Based on thirty years of action research with Fortune 500 companies, government agencies, the military, and large non-profit global organizations Provides worksheets, tools, case examples, and assessments that you can immediately apply to all types of change efforts Contrasts two vastly different leadership approaches to change, and reveals why only one works Provides solutions for turning employee resistance into commitment Outlines the common mistakes in change and how you can avoid them Reveals the differences between transformation and other types of change so you can build strategies that really get results
